Tuesday, February 6, 2018
1 p.m. • At the Ranch • McHenry, ND
9 miles N. of McHenry, 2 miles E. and 1/2 mile N.
Welcome Cattlemen,

We would like to welcome you to our annual production sale. This year has been a challenging year for many. From the raging wildfires to the severe drought we have had to make tough management decisions in times of crisis. We can only pray that 2018 will bring lots of moisture to the area to relieve a lot of these drought stressed areas.

On a much more positive note it is exciting to see the cattle market move in a positive direction. Many of us are seeing 2-300 dollars increase in our feeder calves from the previous year. Red Angus heifer calves are still topping the market all over the country. The demand for Red Angus sired calves isn’t slowing down. The Red Angus breed is growing at a rapid rate and is now the number two breed in the country.

This is the strongest and deepest set of bulls I have offered. We are putting in about 100 embryos a year now and it is really paying off. You will find many full sibs in this offering. It brings uniformity and consistency to this offering. This is our Herd sire, Bieber Driven’s first calf crop. Wow are they impressive. It is also the first calf crop of Bieber Laura 158W. Her bulls are also very impressive. We have been adding genetic pieces to the puzzle to improve our herd and offer you the best genetics this breed has to offer.

All of the bulls in this sale are raised by Twedt Red Angus. We do not have any cooperators. We are a small family run operation. I pride myself in knowing my cow herd very well. Our cows are run in a very strict manner. We cull extensively for feet, udder, disposition, and fertility. There are no excuses.

All of the bulls in the sale have been DNA tested and carcass ultra-sounded which will be provided the day of the sale. We strive in trying to provide you with the most data possible to better help you make your genetic selection.

We would like to thank all of our past customers and are excited to meet new ones. We hope to see you all Feb. 6th at the ranch. Stop out anytime to see the bulls before then.

Sam Twedt

Watch and Bid Online at DV Auction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DV Auction web site at www.dvauction.com
- Click on the “Create New Account” tab
- Enter a user name, password and your contact information.
- Complete the Biologics Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click “Create Account”
- Complete the process by answering a few questions, selecting your subscription choices
- Click on “Apply for Bidding” in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DV Auction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DV Auction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can’t access a computer during the sale, you can now place a “proxy bid” through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a “Proxy Bidding” link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you’d like to bid, and our system will represent your bid just as if you were there.
Welcome,

Thank you for making plans to attend our fourth annual Angus production sale. We are third-generation ranchers in the heart of North Dakota. We continue to use proven family practices and meticulous management. In addition, we are adding the use of advancements in technology to manage our operation. We have carefully built our herd with traits such as reproductive efficiency, docility and performance, all in moderately framed and sound structured cattle.

This year we are able to provide you with a larger selection of quality embryo calves. Our goal is to continue to offer these carefully chosen genetics, in a more superior set of bulls each year. The embryo calves for 2018’s sale include genetics from cows and bulls that prominently demonstrate the characteristics imperative to the foundation of anyone’s herd. Additionally, we are utilizing genetics essential for constructing modern day broody and high performing Angus cattle. The combination of these fundamental genetics, allow you as our customers, an advantage, to breed for growth, longevity, and sustainability. We are very excited to see our customers utilizing these Angus genetics and the resulting benefits.

These bulls have been fed a ration of alfalfa, corn silage, corn dry distillers and a complete mineral package. These bulls have been fed to grow and mature but not pushed too hard, in order to promote longevity of the bull. The results allow us to share our success with you. You will be pleased with your investment. At weaning, the bull calves and sale heifers received Vista Once SQ, Vision 7 Somnus, vaccinations and pour-on dewormer. Health papers will be furnished sale date for interstate shipment.

Once again, we are offering open heifers coming from the very top cut of our commercial herd. It was difficult for us to let these females go. They are daughters out of some of our highest quality cows and they have the genetics to excel in any cow herd. This is a prime opportunity to add quality replacement females for real world cattlemen.

Whether you are a returning customer or a new friend, we appreciate your support in our program and we will continue to work towards supplying you with the genetics that are fundamental in this industry. Please call anytime to schedule a visit to the ranch. We would love to help you find the bulls specific to your needs and females for the foundation of your herd. We sincerely thank you for your business.

SALE ORDER/SUPPLEMENT SHEET
A sale order sheet will be available sale day, along with a supplement sheet with scrotal measurements and adjusted yearling weights. Red Angus bulls and heifers will sell in catalog order.

LUNCH: A complimentary sale day lunch will be served.

INSURANCE:
Bulls that are purchased sale day become the buyers’ responsibility as soon as they are sold. We recommend insuring your bulls on sale day if they are staying at the ranch.

TERMS AND CONDITIONS
Terms of the sale are cash. Phone or mail bids are welcome and may be given to the auctioneer or any of the sale representatives. Live bidding will be available online at www.dvauction.com. Please review the below information and register early so you are approved as a bidder in plenty of time before the sale. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise. Cattle will sell according to the terms and conditions suggested by the Red Angus Association of America and/or American Angus Association.

GUARANTEE
Ressler Angus Ranch/Twedt Red Angus guarantees all bulls selling for $2,550 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull(s). If a replacement bull is available, he will be provided, or if buyer prefers, credit toward one bull will be given in the following year’s sale, less salvage value of the injured bull. Under no circumstance will Ressler Angus Ranch/Twedt Red Angus be liable for more than the net purchase price of any bull. Please notify Ressler Angus Ranch/Twedt Red Angus as soon as possible, should such an injury occur, to make your claim and arrange your return of the injured bull. This guarantee ends the end of the purchase year.

Should the bull die however, he will not be covered by this guarantee. Ressler Angus Ranch/Twedt Red Angus recommends the purchase of the livestock mortality insurance to mitigate this type of loss.

FEEDING AND DELIVERY
Bulls are kept free of charge until April 1. Free delivery is offered in North Dakota or up to 300 miles on bulls (delivery beyond at cost). We will assist in any way possible to get your bull to you.

Leave delivery instructions at settlement time. Delivery on heifers is at buyer’s cost.

BREEDING GUARANTEE
All bulls are guaranteed breeders and guaranteed healthy on sale day. All bulls will be semen tested before delivery. Scrotal measurements will be available sale day. Bulls are guaranteed breeders their first breeding season. Pink Eye and Foot Rot shots are available on request at the time they are semen tested.

SEMEN INTEREST:
Ressler Angus Ranch and Twedt Red Angus will retain a one-third semen interest in all bulls sold.

CATTLE VIEWING:
You are welcome to view the bulls at Ressler Angus Ranch in Cooperstown, N.D., any time prior to the sale date. On Monday, February 5, the bulls will be moved to the sale location and sorted into pens for viewing on the day of the sale.

All Twedt Red Angus bulls and heifers will be available for viewing at the sale location and sorted into pens for viewing on the day of the sale.

VIEW AND BID ONLINE:
Live bidding will be available online at www.dvauction.com. Please review the information on the inside front cover and register early so you are approved as a bidder in plenty of time before the sale.

706 has been a standout since birth. He is super stout, smooth made and is really clean fronted. This bull is a Spartacus son out of a proven donor cow that we purchased from Bieber Red Angus. Belga 345X is a moderate-framed cow with a beautiful udder. This bull travels very well and really stands out in the pen. We are really excited about him and plan to sample him this spring.
Red Angus Bulls

765 is the first of two full sibs that have been standouts since birth. 765 is also the first Bieber Driven son to sell. As you walk through the pen of bulls, the Driven sons will stand out. 765 is super deep, thick made with a dark red hair coat. He is out of 3K Crystal 6228 who has done a outstanding job for us. She has a perfect udder and feet. This bull’s full sister is probably my favorite heifer in the replacement pen. We feel this bull has a bright future ahead of him.

737 is the more calving-ease version of the two brothers. He is super smooth made and put together very well. Unfortunately, shortly after this flush, we lost Crystal 6228 so this will be the last two sons to sell out of her. Don’t miss the opportunity to purchase these genetics. 737 has white in front of the navel so he is registered as a Category 2.
Red Angus Bulls

Lot 4

HB GM CED BW WW YW M ME HPG CEM ST Marb YG CW REA Fat

725 is the first of another set of full brothers to sell – the first of the Laura 158W sons. We purchased Laura in Denver two years ago from Biebers for $30,000. We added her as a genetic piece to advance our program. She has not disappointed. Laura is the dam of Bieber Hard Drive, Bieber Deep End and Bieber Gladiator. She is a herd bull making machine. 725 and 701 are full sibs to Bieber Deep End. 725 is a moderate-framed, super soggy and deep-made bull.

Lot 5

HB GM CED BW WW YW M ME HPG CEM ST Marb YG CW REA Fat
115 55 6 0.8 76 124 22 0 16 4 7 0.65 -0.04 45 0.85 0.04

701 is the other brother and not a step behind at all. I don’t know which one I would pick over the other. They are both very good. 701 as a baby calf had some constipation issues starting out and had a poor recip cow which hindered his weaning weight. He has turned it on since weaning and has caught up with the rest of the bulls now. Don’t overlook him because his weaning weight was a little lighter. The disposition on the Laura bulls is second to none and will add docility to your herd. Nothing startles them.

- BIEBER TILLY 233U
- LJC MISSION STATEMENT P27
- BASIN LAURA 5301

713 is a TANK. He is a bull that will calve easy and flat out put pounds on your next calf crop. He has more middle and depth of rib than I have ever seen a bull. He came out at 80 pounds and weaned off at 895. That’s tough to beat. His is also out of Laura 158W. He is a full sib to Bieber Gladiator owned by VF Red Angus in Oregon. This bull will inject growth into anyone’s herd.

7103 is a super deep, correct-made bull. He is out of our Primrose cow that has been a female-producing machine for us for many years. Her daughters just don’t miss so we started flushing her and haven’t been disappointed yet. It would be tough to find a bull with a more complete EPD profile. Most of his traits rank in the top 20% in the breed. 7103 was raised at Bovagen where his dam was being flushed, so therefore he has no ratios.

- LSF SAGA 1040Y
- TKP BONNE BEL 110
- ANDRAS NEW DIRECTION R240
- VRRA ADELINE C04
- VRRA ADELINE T32

763 is the only Cinch son in the sale but boy is he a darn good one. He is super dark red and has a wicked rear end on him. He was raised by a first-calf heifer that we purchased from Valnes Red Angus. She is a beautiful Andras New Direction daughter. She weaned her first calf off at 834 pounds – he was almost as big as her at weaning. She did a great job her first year.

**772 is another powerful bull. He is the first of the Sadie R5067 sons to sell. We flushed her once and got eight bulls out of the flush. You will find Sadie sons throughout the whole catalog and they could have all been at the front. They are very good bulls. This one has the most growth of the sons, weaning off at 895 lbs. This is a very impressive bull.**

**758 is another Sadie by Driven with a little more calving ease but still lots of growth. The high-selling bred heifer in our 2017 sale was out of Sadie R5067. The Sadie cow family is known throughout the breed and is a very good one. These will be her last sons to sell. We sold a full sister to him in the ND Red Select Sale in December to Turtle River Cattle Co.**

7111 is a dark cherry red, super thick and deep Epitome son that really stands out. Those of you that have been to this sale before know that my nephews each have a cow that runs at Twedt Red Angus. This is Liam’s bull and boy is he a dandy. He came out easy and really packs on the muscle. He would be a great heifer bull prospect.

766 is one of the few Hard Drive sons in the sale and boy is he dandy. He is out of a first-calf High Yield heifer and she did a heck of a job on her first calf. Hard Drive x High Yield has been a mating that really has clicked for us. He is one of the top weaning weight bulls in the sale and ranks in the top 1% for WW and 2% YW.

This is a rare opportunity to own a FULL brother of the $100,000 Select Sires stud bull, SAC Conversation. He is a phenotypic stand out worthy of your consideration. We kept every single Conversation heifer, each one exudes style, depth and extreme eye appeal. We predict that you will want to keep every one of the daughters as they will exhibit the same feminine package.

Lot 54 is a full brother to SAC Conversion who sold for $100,000 to Select Sires.

Lot 54 is also a full brother to SAC Messenger who sold to Mohnen Angus & ST Genetics for $70,000.
EA MADAME PRIDE 0400, dam

**Ressler Conversation 718**

Ressler Conversation 718 comes from a carefully chosen mating that resulted in a bull expansive in his rib, wide across his top, and stands down with extra base in his hind quarter. He’s out of one of our best donor cows. She raised Accelerated Genetics stud bull, Ellingson Secretary 2011. The full sisters out of this mating look PHENOMINAL. They are easy fleshing, deep ribbed, and thick into the hind quarter.

This is a great herdsire prospect that will increase profitability with his consistently high scores in the $Value department and an impressive +118 YW. His dam started her career with a weaning ratio of 3@106 and he earned an individual weaning ratio of 109. 701 demonstrates that ideal Angus breed phenotype, flare through his shoulder, square through his hip, and depth in his rib.

This Big Sky son is a smooth made bull with a moderate 66 lb BW, a +11 CE rating, and a 745 lb WW. He is uniformly made with the muscling carrying all the way through to his base. He should add consistent stretch and thickness to a set of calves.

Ressler Fortress 723 is out of a phenomenal cow. Last year she produced a quality bull purchase by Verlin Steppler of Montana. This year’s calf is another deep barreled and naturally thick example. He excelled in the feed lot and should sire the same kind of calves. If you are looking to add performance to your females and pounds to your feeder calves, this is your bull.

This Conversation bull offers cattlemen an outcross deep in his rib, thick over his top, and excellent in his foot and leg structure. With his Dam holding a weaning ratio of 7@102, an IMF ratio of 3@116 and a RE ratio 3@102, he should sire high functioning females that perform. He ranks in the top 10% for Milk, SG, and SYG.

Ressler Fortress 723 is out of a phenomenal cow. Last year she produced a quality bull purchase by Verlin Steppler of Montana. This year’s calf is another deep barreled and naturally thick example. He excelled in the feed lot and should sire the same kind of calves. If you are looking to add performance to your females and pounds to your feeder calves, this is your bull.

This Conversation bull offers cattlemen an outcross deep in his rib, thick over his top, and excellent in his foot and leg structure. With his Dam holding a weaning ratio of 7@102, an IMF ratio of 3@116 and a RE ratio 3@102, he should sire high functioning females that perform. He ranks in the top 10% for Milk, SG, and SYG.
Lot 70

This moderate framed bull is naturally balanced in his shape, deep in his rib, and expressive in his muscling. Add that to a balanced set of EPD and you have a bull you can use to add stretch to his progeny and improve the carcass scores of your feeder calves. This bull’s dam has a calving ease pedigree, but this year we bred her to a cow bull.

Lot 71

This smooth and stylishly made Bullseye son is out of a moderately framed easy fleshing cow. She has a tight udder with small teats. This is the last year to get your hand on one of these Bullseye sons. His calves are known for producing performance driven daughters with good temperaments and steers that pack on the pounds in the feed lots. Pair that with the maternal strength found in his grand-dam, boasting a weaning ration of 11/13.

Lot 72

This bull is out of a cow that produces a consistent type every year. He is one of the youngest on the sale and he has still earned his keep. He is a larger framed Bullseye son that will add performance, pounds, and profit to your calf crop.

Lot 73

Ressler Recharge 702 reigns from a prolific bloodline of broody cows. She successfully raises a top notch calf year after year. This year’s calf is no different. He expresses that natural thickness through his hip and shoulder all the way into lower quarter and down into his base as well as excellent foot and leg design.

This is one of only 3 Conversation and Madame matings offered in this sale. These sons provide a unique outcross for many of today’s ranchers with performance running deep in the bloodlines. 745’s expressive muscle pattern carries through into his thick hindquarter and his top expresses amiable dimension. We have retained every single heifer from this mating and you will want to do the same with his daughters. It truly is his maternal attributes that will command your attention.
Ressler Bank Note 715 is a well balanced calving ease prospect that offers cattlemen an outcross. He has ideal length and expresses a big hip in a moderate frame. His dam is that ideal sized cow producing a consistent BW. He should stamp his calves with that same phenotypic look, the look that will take your calves to the next level come sale day.

This is a very complete maternal Recharge son out of a top producing cow in our herd. He has a maternal quality in his pedigree, one needed to sire fertile and high functioning females. He also has the genetics to sire a quality set of feeder calves, especially with an impressive +117 YW. You will recognize his true value when his daughters come into production.

This All In son has unexpected size, stretch, and muscle mass coming from a first calf heifer. He models that Angus breed look, in terms of his extra thickness in his hind quarter, voluminous shape in his rib, and natural width over his top. His dam expresses that same model Angus look and comes from a long line of proven producers.

Bank Note son out of a cow that has made a lot of noise early in her production career. She boasts a weaning ratio of 2@111. 732 is moderately framed and carries shape into his rib and hind quarter on a sound set of feet and legs. He is the kind that should sire high growth calves.
Ressler Bulls

80 Ressler BULLSEYE 753

This is a moderate BW Bullseye son that stands down in his circumference of bone, square in his structure, smooth in his shoulder, and ample shape to his top and hind quarter. He owns an imposing set of performance traits, +73 WW and +128 YW. His young dam carries a weaning ratio of 2@104 and his grand dam holds a noteworthy wean ratio of 9@110. Once again, a bull that influences fertility, longevity, and performance all into one package.

81 Ressler BANK NOTE 714

An attractively made Bank Note son out of a smaller framed cow with an excellent udder and small teats. He harnesses strong maternal strengths coming from both the top and bottom sides. This should provide a fancy set of future replacement heifers to choose from. May be suitable for heifers.

82 Ressler BULLSEYE 764

Here is a moderately framed Bullseye son out of an ideal sized and easy keeping cow. He expresses that natural muscle on a working set of feet and legs, allowing him to move out athletically across the pen. He should make an excellent addition to anyone’s herd.

83 Ressler FORTRESS 742

Ressler Fortress 742 offers a calving ease outcross in a double bred performance package. He could see considerable application in some of the most popular bloodlines cattlemen currently have in their herds. His docile dam exhibits a flawless udder and teats. This bull is stacked with maternal quality going back several generations. His grand-dam earned a weaning ratio of 8@104 and his great grand-dam boasts a weaning ratio of 11@113. This bull will instill maternal quality into a group of replacements.

84 Ressler IRON 752

This is a deep profiled individual that moves out athletically across the pen. He comes from a line of performance bloodlines that also excel in first time heifer pregnancy retentions. His dam has a HP (fertility rate in daughters) that is ranked in the top 3% in the Angus breed. His strengths many not be realized until his first daughters calves start hitting the ground.

85 Ressler ALL IN 710

Ressler All In 710 incorporates structural integrity and maternal quality. He has base to his rib and breadth across his top. He is smooth made on a sound set of feet and legs. His granddam has a dependable weaning ratio of 13@101. This bull is phenotypically pleasing to the eye and bring the genetics to your herd.

Ressler Fortress 744 is a herd sire prospect offering another opportunity for an outcross. He is a smooth made, moderate BW bull, AI’d 6 generations back. His grand-dam displays a weaning ratio of 40:103 and he himself owns a strong set of WW and YW performance traits. This is an excellent opportunity to own a herd sire that comes from a direct result of strong reproductive fertility.

Ressler Bullseye 747 excels in the calving ease department and was bred with commercial cattlemen in mind. He stems from a cow moderately framed with consistent producing career and the ability to keep her condition through each year. This bull has lots of volume and capacity through his midsection and moves out effortlessly on a superior set of feet and legs.
Wow what a bred heifer to start off the bred heifers with. She is a tank. In our ET program this is the type of heifers we strive to produce. This heifer is super deep ribbed and thick. She is a full sister to our high-selling bull in our 2017 sale to Gill Red Angus. The Colleen 429 and Rollin Deep full was one of the most consistent flushes I have done. This is an opportunity to purchase part of that. She is selling AI bred to Pieper Just Right. This calf could be special. Due 2-22-2018.

6104 is an outstanding Epitome bred heifer. I selected a few of the Epitome heifers for this sale to show you what the sire can do. Epitome on the top and Bieber Hughes on the bottom is going to make an awesome cow. Dam has an MPPA of 102.7. She is dark cherry red and super long with lots of rib. She is also AI bred to our exciting new herd sire, Crump Forerunner 6601, that we purchased last year from Crump Red Angus. We are excited to see the first calf crop out of him. Due 2-22-2018.

607D is a heifer we purchased from the Cutting Edge Ranch this spring and has unfortunately fallen outside our calving window so we are offering her to you today. She is a beautiful heifer. She sells bred to Federalist. Due 4-29-2018.
108 45 Commercial Red Angus x Simmental Open Heifers

These heifers are about as uniform group of open heifers as you will find. They were hand-picked to out of a group of about 110 heifers. The heifers were selected from the commercial side of our operation that my dad, Gerald Twedt runs. These heifers are out of Twedt Red Angus bulls as well as a few Simmental bulls that were used. These heifers will make an excellent group of cows. The heifers are tagged 701-745. The buyer takes a minimum of 5 head and can take the whole group. Heifers will sell in order of tag. These heifers have been Bangs vaccinated, Preg checked and are breedable.

109 40 Commercial Purebred Angus Open Heifers

This complete set of stylish heifers is hard not to get excited about. They are direct daughters from top end of our commercial females. The dams of these heifers raise a consistent type season after season, steers that perform and heifers that are maternal. These stout profiled brood cow prospects will be a profitable contribution to any aspect of the beef industry. Many of these females could see success in the show ring before making a lasting impact through their production career in your herd.

This group of heifers was fed a balanced ration of hay, corn silage, dry distillers, and a complete mineral package. This custom ration allowed for the heifers to slowly mature in order to insure their longevity and more milk capacity. In the beginning of January they vet checked open, bangs vaccinated, poured and weighed with an average weight of 813 lbs.
