Welcome

Cattlemen,

We would like to welcome you to our annual production sale. It once again has been a roller coaster in the markets. This drop in prices has left many of us scratching our heads. The one thing that has been consistent throughout is the demand for Red Angus Genetics. Red Angus genetics are topping sale barns all over the country.

This is the best set of bulls I have raised to date and I am excited for you to come and evaluate them. The depth in this offering is outstanding. It has never been about trying to sell the most bulls I can. It has always been about selling the best bulls I can. Over the past few years we have spent a lot of money on herd bulls and donor cows in order to bring you the best genetics. It is starting to pay off and really shows in this offering. You will see it in this year's set of bulls. These bulls were weaned on Sept 16. All natural born bulls received no creep feed. We feel its important to know what these bulls can do on the dam's milk and grass. It is also important for us to know how the cow performs in order to cull accordingly. We did creep feed all the ET bulls this year to help them show their full genetic potential in case the recip cow wasn't as good. The bulls are fed a growing diet of corn silage, grass alfalfa mix, corn and distillers and a Vigortone mineral to help semen development.

We want to thank each and every one of you who has purchased cattle from us in the past as well as our future buyers. We can't do what we love without you, so thank you! If you have any questions about the offering please feel free to give us a call or check our website for up-to-date information. Please stop in and see the bulls anytime when you're not out moving snow! Stay safe and warm this winter season hope to see you Feb. 7th!

Sam Twedt

DVAuction **Broadcasting Real-Time Auctions**

Watch and Bid Online at DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Welcome,

Thank you for making plans to attend our third annual Angus bull sale. We are third-generation ranchers in the heart of North Dakota. We use proven family practices and meticulous management. We have carefully built our herd with traits such as reproductive efficiency, docility and performance, all in moderately framed cattle.

We continue to enhance our bloodlines with the addition of outstanding donor cows from Ellingson Angus, Blair's Angus, and Nelsons Ranches. You will see these results in our sale bulls and phenomenal replacement heifers as our herd continues to incorporate these high end genetics.

This set of bulls is the most uniform group of bulls that we have raised. Over half of them are out of the breed-leading AI sires. This year we are offering something new. We have 50k'd all of the bulls in the sale. We invested in this newer technology to help guarantee the accuracy in the EPDs. It is our intent to take the guess work out of breeding, especially when it comes to traits like birth weight.

These bulls have been fed a ration of alfalfa, corn silage, corn dry distillers and a complete mineral package. These bulls have been fed to grow and mature but not pushed too hard, in order to promote longevity of the bull. The results allow us to share our success with you. You will be pleased with your investment. At weaning, the bull calves and sale heifers received Vista Once SQ, Vision 7 Somnus, vaccinations and pour-on dewormer. Health papers will be furnished sale date for interstate shipment.

In this catalog you will find a few bulls with larger birth weights. Each calf born on our facility is weighed on an electric scale. These weights are 100% accurate, they are NOT taken with a foot tape or lifted up with a bouncing scale. These dams

have the pelvic capacity in which to have a larger birth weight calf and their calves are shaped right with a small head and smooth in their shoulder allowing them to be born with no assistance. These bulls are in the sale because they have something to offer you.

Ryan, Meghan, Reid, Lane, Nola and Kimmie Ressler

Once again, we are offering open heifers coming from the very top cut of our commercial herd. It was difficult to let some of these girls go, knowing what their dams have done and the phenomenal potential these heifers have. This is a prime opportunity to add quality replacement females for real-world cattlemen.

Whether you are a returning customer or a new friend, we appreciate your support for the betterment of our industry. Please call anytime with questions or to schedule a visit to the farm. We thank you for your business.

Sale Information

SALE ORDER/SUPPLEMENT SHEET

A sale order sheet will be available sale day, along with a supplement sheet with scrotal measurements and adjusted yearling weights. Red Angus bulls and heifers will sell in catalog order.

LUNCH: A complimentary sale day lunch will be served.

INSURANCE:

Bulls that are purchased sale day become the buyers' responsibility as soon as they are sold. We recommend insuring your bulls on sale day if they are staying at the ranch.

TERMS AND CONDITIONS

Terms of the sale are cash. Phone or mail bids are welcome and may be given to the auctioneer or any of the sale representatives. Live bidding will be available online at www.dvauction.com. Please review the below information and register early so you are approved as a bidder in plenty of time before the sale. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise. Cattle will sell according to the terms and conditions suggested by the Red Angus Association of America and/or American Angus Association.

GUARANTEE

Ressler Angus Ranch/Twedt Red Angus guarantees all bulls selling for \$2,550 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull(s). If a replacement bull is available, he will be provided, or if buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Under no circumstance will Ressler Angus Ranch/Twedt Red Angus be liable for more than the net purchase price of any bull. Please notify Ressler Angus Ranch/Twedt Red Angus as soon as possible, should such an injury occur, to make your claim and arrange your return of the injured bull. This guarantee ends the end of the purchase year.

Should the bull die however, he will not be covered by this guarantee. Ressler Angus Ranch/Twedt Red Angus recommends the purchase of the livestock mortality insurance to mitigate this type of loss.

FEEDING AND DELIVERY

Bulls are kept free of charge until April 1. Free delivery is offered in North Dakota or up to 300 miles on bulls (delivery beyond at cost). We will assist in any way possible to get your bull to you.

Leave delivery instructions at settlement time. Delivery on heifers is at buyer's cost.

BREEDING GUARANTEE

All bulls are guaranteed breeders and guaranteed healthy on sale day. All bulls will be semen tested before delivery. Scrotal measurements will be available sale day. Bulls are guaranteed breeders their first breeding season. Pink Eye and Foot Rot shots are available on request at the time they are semen tested.

SEMEN INTEREST:

Ressler Angus Ranch and Twedt Red Angus will retain a one-third semen interest in all bulls sold.

CATTLE VIEWING:

You are welcome to view the bulls at Ressler Angus Ranch in Cooperstown, N.D., any time prior to the sale date. On Monday, February 6, the bulls will be moved to the sale location and sorted into pens for viewing on the day of the sale.

All Twedt Red Angus bulls and heifers will be available for viewing at the sale location and sorted into pens for viewing on the day of the sale.

VIEW AND BID ONLINE:

DVAuction Broadcasting Real-time Auctions

Live bidding will be available online at www.dvauction.com. Please review the information on the **inside front cover** and **register early so you are approved as a bidder in plenty of time before the sale.**

Herd bull alert here! STRA Trending 618 has been a standout since birth. He's dark cherry red, deep ribbed, super thick and has a big rear end on him. This is the most complete bull I have raised. His dam is a Glacier Logan 210 daughter that has proven the test of time at age 12. She still has an outstanding udder and foot. She was purchased from Jacobson Red Angus where she was also a donor cow. She left her mark on his herd and now she is doing the

same here. His sire is Bieber Rollin Deep who is no longer producing semen. This is a prime candidate to replace him. This is a must-see bull to fully appreciate him. We plan on sampling this bull in our own program in 2017. DNA data will be available sale day. **Retaining 50% semen interest.**

Full brothers sell as Lots 2, 19, 20 and 42.

BIEBER ROLLIN DEEP Y118

HRR COLLEEN 429

Red Angus Bulls

LOT 2

Lot 2 is a full brother to Lot 1 and boy, don't let Lot 1 overshadow this guy because this guy is right up there with him. It has been fun to watch these two bulls grow up together. This bull is long, straight across the top and thick throughout. Don't miss the opportunity to buy one of these sons. DNA data will be available sale day. Full brothers sell as Lots 1, 19, 20, 42.

Lot 6 is another outstanding Epitome son out of one of my favorite cows. She brings a top bull to the sale every year. This bull is a twin and we were getting so many twins we left both calves on the cow. She weaned off almost 1,500 pounds of calf between the two and bred back to be one of the first cows to calve this year. Check out that picture of the dam. She was pictured this summer after having the twins with both calves on her! This is one outstanding bull! Don't overlook him because he is a twin.

Lot 7 is another outstanding Rollin Deep son. If you want calves that come out small and grow, this is your guy. How many calves are born at 70 pounds and wean off over 800? Not very many. Sometimes when I see a calf with this much performance, it's hard to recommend him for heifers but with a CED of 11 and -3.8 for BW, I think he will be just fine. He also is in the top 3 % for Milk EPD.

Lot 8 is out of one of the most sought-after sire groups in the country right now. Hard Drive semen is very hard to find if not impossible, and he is no longer producing. They are popular because they come out small and grow like crazy and, to top it off, the females are outstanding. I also have to comment on the Hard Drive calves' disposition because I have never seen a sire with such docile offspring. They truly become like pets. This guy has a big spread from -1 BW to 112 WW.

Lot 9 is the first of three powerful New Direction sons out of our Cherabel 227 donor cow. This calf is fun to look at. He is long bodied, real smooth made and dark cherry red. We started flushing the Cherabel cow a few years back cause her daughters are spectacular. They all have perfect udders, good feet, and are performance machines. If you want performance and maternal in your herd, buy one of the Cherabel 227 sons. Full brothers sell as Lots 27 and 36.

Lot 25 is a real thick, deep-bodied bull out of a 14-year-old cow, who has done it year in and year out. I told myself if she didn't stick AI I would sell her. That was four years ago, and she has been sticking AI ever since, but this year I decided it was time for her to go and didn't even expose her. At 14 she still had good feet and a good udder. This is her last calf and he weaned off at 791 pounds. If you want super good females and longevity in your cowherd this bull will get it done. She ended her career with a 106 MPPA.

Lot 46 is the last High Yield in the sale but he is backed by one of the cows we flushed this spring. The Sadie cow family is a well-known cow family with in the breed. She adds a lot of performance and depth of rib to her calves. One of younger calves in the sale but he is one not to be overlooked!

This ET calf is out of our donor cow, BR Ruby 529X and Recharge. She produces calves with the same depth and easy fleshing capabilities that she carries. He is also expansive in his rib, deep though his side, and massive in his hindquarter. Her son is sure to sire the same producing type females with clean and neat udders.

SAV RECHARGE 3436

B/R RUBY 529

This bull has a lot of power, packed in a stout body with the foot structure that you hope for. He expresses natural thickness over his top line and a great deal of muscle into his hindquarter. He is out of an 11-year-old cow that raised one of last year's high-selling bulls and she has produced another impressive son for this year's sale.

This bull has been a standout since the beginning. He is a phenotypic gem that imposingly carries depth and muscle thickness all along his top line and down through his hind quarters, all in a moderate frame. His dam consistently produces offspring of this standard and we have kept several of her heifers. We expect you will want to keep the deep-bodied heifers he will sire.

This is a stout and stylish Recharge son, raking in the top 1% for milk production and expresses a wide base and desirable foot structure. His 9-year-old dam has raised 6 @101, breeds back every year, and retains great body condition at the end of every season. The combination of these traits creates a bull that you will want to incorporate into your genetics.

LOT 56

All Ressler Angus bulls have genomically enhanced EPDs through Zoetis' i50K test.

This big-bodied and deep-sided calf has the dimension and muscle expression that you typically only find in a cow bull. But with a 78 lb BW, +14 CE, and a -.5 BW, you can't afford to pass this one up. This is a sleep-through-the-night kind of bull that will still add pounds to your calves. Suitable for heifers.

A Capitalist son that is smooth in his shoulder, shows nice length front to back, expresses a moderate frame and carries a balanced set of EPDs. He is out of a first-calf heifer stemming from a very prolific cow that weaned 7 calves at 104. This bull should sire consistency in his moderate birth weight calves which will come easy and grow well. May be suitable for heifers.

This bull is out of a first-calf heifer beginning her career with a bang. Her son earned an Adj WW of 818 lbs and an outstanding weaning ratio of 115. His grandam is coming 13 years old and bred back early once again, proving the longevity and fertility this bull possesses. He should provide a multi-faceted improvement by adding stretch, frame and pounds to your next calf crop. With a moderate birth weight of 83 lbs and +7 for CE, he may be suitable for heifers.

This Guinness son confidently carries a ton of muscle along his top line, down through his hind quarter and ample substance throughout, that can be seen from any angle. He should have calves hitting the ground with a light to moderate birth weight, then come weaning time, steers that turn on the performance and heifers that express that feminine look with excellent maternal attributes. May be suitable for larger framed heifers.

This bull is out of moderately framed and deep-ribbed cow that produced one of the top-selling bulls at last year's sale. This year she has provided us with another phenotypically pleasing bull. He was bred to yield bonus returns for commercial cattle producers. May be suitable for heifers.

This Bullseye son pounded down the scale this fall resulting in an Adj WW of 848 lbs. In addition, he ranks at the top 1% in \$F, Milk and YW. He is out of a consistently producing dam, who has been nothing short of incredible in her beginning production career with 2 @ 116. He should pass on exceptional traits for both feeder calves and replacement females.

This bull is sired by our Ambush herd sire that has served us well and this is his final set of calves to sell. Lot 82's dam comes from a long line of great maternal genetics. His grandam is an excellent example of longevity, proving herself by earning Pathfinder status right away. This bull's dam is on the same path - raising 3 @ 105. He should produce a predictable set of moderate BW calves that excel in performance and great females - keep every one of his daughters.

This bull is thick in his back quarter and deep through his middle. He is out of a moderate cow with expansive rib, a good udder and small teats. With this guy ranking in the top 2% for \$B and the top 3% for rate of average daily gain. He has what it takes to sire calves that gain efficiently for maximum profitability, as well as females for the real world cattle industry.

An attractively long and balanced-trait bull bred specifically with commercial cattlemen in mind. He should produce extra profit for those that sell their calves by the pound. He carries the mark and qualities of the Angus breed from when it was established.

This bull is out of our Capitalist son and a first-calf heifer. His young dam is feminine, long, and has an angular look in that ideal cow size. He boasts a +8 CE, -.6 BW, a 76 lb actual BW, and a 723 lb Adj WW. Those EPDs should sire light birth weight calves, add length, pass on his stylish look, and increase pounds at weaning. If you sell your calves right off the cow, this is one you are going to want to check out. Suitable for heifers.

5127 is a High Yield daughter. We are not offering very many High Yield daughters for sale anymore because High Yield is gone and these daughters are very good. This heifer is calving a little later so we decided to offer her for sale. She is a real nice heifer. Bred Bieber Federalist B543, due 5-2-2017, Sex unknown

591 is last but certainly not least. She is another real good High Yield daughter. She comes from a real good cow family. Dam has excellent feet and udder. Bred Bieber Federalist B543, due 4-6-2017, Sex unknown

Commercial Red Angus Heifers

106 50 Commercial Red Angus x Simmental Open Heifers

These heifers were handpicked out of a 120 heifers from my dad, Gerald Twedt's herd. They are Simmental-Red Angus cross heifers. The Simmental bulls used are mostly Kjølgaard Simmental bulls and the Red Angus are Twedt Red Angus bulls. This is one awesome pen of heifers. The heifers are Bangs vaccinated and guaranteed open.

These heifers were all weighed on January 5 and were weighing an average weight of 775 lbs. with the top heifer weighing 875 lbs. and the smallest heifer weighing 715. They are one even group of heifers. These heifers could go into anyone's herd and make a difference backed by years of genetic selection for fertility and performance. This is a must-see group of heifers.

Commercial Angus Heifers

107 40 Commercial Purebred Angus Open Heifers

This complete set of stylish heifers is from the top of our commercial herd, we held nothing back this year. These girls rein from a long line of productive, moderately framed cows that phenotypically stand out, and show off quality udders. The dams of these heifers raise a consistent type season after season, steers that perform and heifers that are maternal. The heifers offered in this selection are no different. They carry a blended set of genetics for replacement quality females and they will inject maternal greatness into your herd.

This group of heifers was fed a balanced ration of hay, corn silage, dry distillers, and a complete mineral package. This custom ration allowed for the heifers to slowly mature in order to insure their longevity and more milk capacity. In the beginning of January they averaged 776 lbs.
