

# *Tweatt* RED ANGUS

*Annual  
Production Sale* Tuesday,

**February 7, 2023**

**1 p.m. CST • At the Ranch • McHenry, ND**

9 mi. N. of McHenry, 2 mi. E. & 1/2 mi. N.

# Welcome

Cattlemen,

We want to welcome you to our 13th annual production sale. We are excited to show you our offering this year as we feel it's the deepest and best set yet. The quality in the bulls runs all the way to the end. We do not put bulls in the sale that we don't think will help improve your herd.

We try to offer you as many tools as we can to help you make your genetic selection. All of the bulls in the sale are parent verified, have genomic-enhanced EPDs, have been carcass ultra-sounded and all performance records are available. If you have questions, please call.

Customer satisfaction is very important to us. We want to hear how the bulls are working or not working. Your feedback helps us improve and serve you better. We understand that not everyone is looking for the same types of bulls and sale day goes by very fast. It is just not possible for us to visit with everyone. We welcome you to stop out prior to the sale and go through the bulls so we can discuss your goals for your ranch and cow herd and help you make your selection for your program. If you are unable to make it to the ranch, please give us a call ahead of the sale and we would be glad to discuss the offering with you.

We want to thank all of our past customers! We take the responsibility of raising seedstock very seriously because we know that the genetics you purchase from us will affect your ranches profitability in the future. Thank you for trusting us and we hope you continue to trust us in the future.

We hope to see you February 7th, but if you can't make it, please join us on DVAuction!

*Sam Twedt*

10% off on 10 bulls

### TERMS AND CONDITIONS

Terms of the sale are cash. Phone or mail bids are welcome and may be given to the auctioneer or any of the sale representatives. Live bidding will be available online at [www.dvauction.com](http://www.dvauction.com). Please review the below information and register early so you are approved as a bidder in plenty of time before the sale. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise. Cattle will sell according to the terms and conditions suggested by the Red Angus Association of America.

### HERD HEALTH

Town and Country Vet Clinic, New Rockford, ND ..... 701-947-2000

### GUARANTEE

All bulls in this sale are guaranteed to pass a breeding soundness and health examination. In the event that a bull does not pass or is injured while at Twedt Red Angus, a bull of equal value will be given or your money back. Once the bull leaves Twedt Red Angus, he is the buyer's responsibility. We encourage buyers to purchase morality and loss-of-use insurance.

### SEMEN INTEREST:

Twedt Red Angus will retain a one-third semen interest in all bulls sold.

### CATTLE VIEWING:

You are welcome to view the bulls and heifers prior to the sale at Twedt Red Angus Ranch.

All Twedt Red Angus bulls and heifers will be available for viewing at the sale location and sorted into pens for viewing on the day of the sale.

### VIEW AND BID ONLINE:

Live bidding will be available online at [www.dvauction.com](http://www.dvauction.com). Please review the information on the **inside front cover** and **register early so you are approved as a bidder in plenty of time before the sale.**

# RED ANGUS MARKETING PROGRAMS

## How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at **940-477-4593** and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

**FCCP Tags**  
99¢ each

**Allied Access Tags**  
99¢ each

**EID Combo Sets**

## *It all begins with the cow ...*

*At Twedt Red Angus, we believe that in order to make our customers successful and more profitable, we need to manage our cow herd in a strict manner. We cull extensively each year for the practical traits that affect your bottom line such as disposition, soundness, udder quality, fertility and performance. We have used the cows pictured on these pages through embryo transfer work to help us move towards our goals. You, as the customer, can buy with confidence knowing that these bulls are backed by cows that have been held to a higher standard.*

2019 has been a standout calf since birth and a bull that I am very excited to start the 2023 sale with. He is super dark cherry red with a ton of length of body. With this bull, you're combining two of the top cow families in our program – the 107w Primrose cow and Tina 662. These are the first ET sons out of Tina and they definitely won't be the last. She is the best footed Red Angus cow I have seen and also has a beautiful udder. You're going to be hearing a lot more about Tina in the years to come. Her first son sold to Cutting Edge Ranch in the 2021 sale for \$16,000, STRA The Legend. We will let you decide which of these first 2 sons is better. True herd bull prospect here.

2201 is a bull that I feel is going to have a very bright future. He combines two of the most famous cows in the Red Angus breed with 113z and 158w. This might be the best 158w son we have ever sold. He is moderate framed and super deep with a ton of thickness. You will travel a long time to find a bull with as much thickness and eye appeal as this guy. He is a true herd bull prospect.

2106 is the first of the Blue Print sons to sell and boy is he a dandy. To say we are excited about the Blue Print calves is an understatement. He is a true calving ease bull that really stamps his calves with as much muscle and shape as any bull in the breed. 2106 is also backed by the great 158w, who is the dam of Hard Drive. He will be easy to find sale day and another great herd bull prospect.

2080 is another powerful Blue Print son out of our 334 donor. He is loaded with muscle. The 334 donor has raised many top-selling bulls for us and I feel this one will be another. His full sister sold in the ND State Red Angus Sale to Feddes Cattle Co. Another bull with herd bull potential.

2209 is a bull that came to us at weaning time from Lucas Cutler. Lucas purchased Six Mile Marta 238c from Six Mile in their 2021 Genetic Focus sale for \$21,000. This is Marta's natural calf. He is super dark cherry red with a ton of look to him. A real special genetic breeding piece that will be a complete outcross here in the United States out of the great Marta 238c. You won't want to miss this opportunity.

Lots 7, 8 and 9 are three full brothers that we feel are some of the best sons of 107w to date. If you have followed our program, you know all about 107w and the influence she has had here. Her most popular son, STRA GENERAL 882 continues to leave his mark on our program. She is not only a herd bull raiser, but one of the best female makers in the breed. Combining that with Township, you are going to have next level daughters. Every single Primrose daughter in our herd goes back to 107w and there is pile of them. They are cows that flat out work. I don't know which of these full brothers is better but if you are looking for a bull to raise you some awesome cows be sure to snatch one or all of them up. They are an impressive group.

2136 is a larger framed, powerful Colonel son out of the great Tina 662. This was her natural calf and an impressive calf indeed. He offers a ton of growth, weaning off at just under 800 pounds and WW ratio of 112.

**Lot 26**

**STRA Tina 662**

## Two-Year-Old Bulls

**These 2-year-old bulls are virgin bulls and were sorted from the rest of the bulls in the fall of 2021. They have been managed differently from the yearlings and have not been offered for sale before.**

**Lot 31**

110 is the first of the 2-year-old bulls and wow for a way to kick it off. This is the type of bull we are striving to produce. He is super masculine, full of muscle and just has that herd bull look. Lots 31 and 37 are twin brothers and we felt like they were behind last year because of it so we kept them over to sell as two-year-olds and they have grown into two impressive bulls.

1201 is a super powerful Red Box son out of the great 158w. Every year we have a few recip cows that underperform due to whatever reason. It causes some of our ET calves to not show their full genetic potential so we hold them over and offer them as 2-year-olds so they have a chance to mature and grow up. This is the story of lot 32 and lot 33. I think you will be impressed by these two now.

1108 is another Relentless daughter out of beautiful Seneca first-calver that comes from the same cow family as Lot 92. Bull bred to L83 Here on Earth 15H. Due 4-15-23.

## 98 17 COMMERCIAL BRED HEIFERS

For the first time ever, we are offering bred heifers right out of the heart of my Dad's herd. These heifers were bred by low-birth-weight Twedt Red Angus bulls and are all sired by Twedt Red Angus Bulls. These heifers are due to calve from April 1 – May 15.

Feel free to call for more information and a complete health record. 701-388-4035

## 99 20 COMMERCIAL BRED HEIFERS

Lot 99 is 20 home-raised heifers right out of Logan & Chelsey Harding's replacement pen. They have a beautiful set of Red Angus and red Simmental cross cows. Logan has purchased top-selling Red Angus bulls from us as well as other reputable breeders in the area. You can buy with confidence that you're getting an outstanding set of bred heifers. These heifers are all AI-bred to STRA Relentless. Due 2-20-2023.

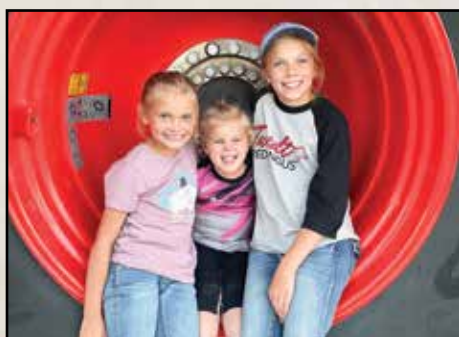

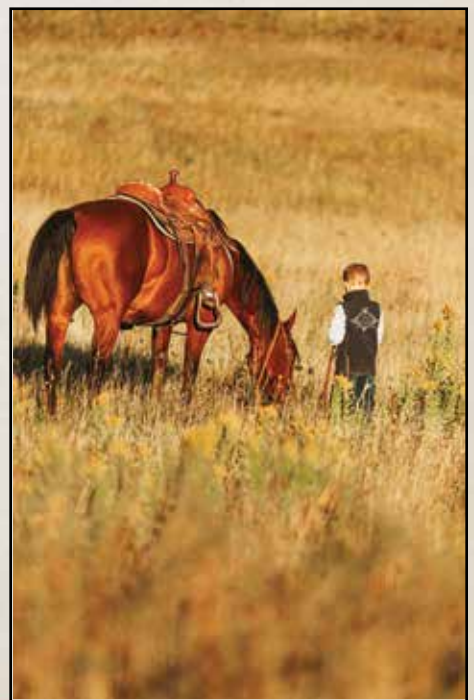

For more information on these heifers, contact Sam or call Logan at 701-650-8817.

## 100 55 COMMERCIAL OPEN HEIFERS

Once again we are selling an elite group of Twedt Red Angus-sired heifer calves. These heifers were hand picked out of a group of 150 heifers. They were selected for uniformity, disposition, size, and phenotype. It would be very tough to find a nicer set of heifers than these. The heifers were weaned the middle of Oct. They received spring and fall vaccinations. They are Bangs vaccinated and guaranteed open and breedable. The heifers sell in numerical order from 201-255. The buyer must take a minimum of 5 head.

Feel free to call for more information and a complete health record. 701-388-4035

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB.....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG .....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**HPG .....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM .....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY .....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB .....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG .....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW .....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA .....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT .....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
